Digital Transformation: Capturing Tribal Knowledge Webinar

Does your business compete using Digital Age tools?

The Digital Transformation continues in unpredictable ways:

- Company workforce changes result in loss of essential tribal knowledge
- The way we work is changing
- The way products are being made is changing
- The pandemic forced unexpected changes and delays in production and administration
- Industry trends are changing
- Customer needs are changing, perhaps becoming even more demanding

Topics Covered:

- While innovation is great, companies sometimes forget to focus and shore up the fundamental components of running the business
- Understanding your maturity and readiness for larger projects
- Conversation on Point Solutions, data, and the challenges companies have
- Application of digital technologies in a practical way to maximize potential
- Leadership commitment to any enterprise transformation

Takeaways:

- How to get started
- Examples of the opportunity that does exist
- Some things to consider when going through a larger digital transformation

Who Should Attend:

- C-Level Chief Information Officer or Information Technology Director, Operations
- VP Engineering, VP Manufacturing, VP Operations
- Manager of Engineering, Quality, Manufacturing, Supply Chain

Date: Thursday, July 15th

Time: 10:00AM-11:00AM PST
