

"Joshua Watson is the Founder of EIS Automation, a Las Vegas based Automation System Integrator with focus on Collaborative Robotics, Machine Vision, ID/Traceability and Packaging Solutions.

Before starting his business Josh has worked in several large scale print manufacturing companies with focus on process control and automation including machine vision for defect detection and robotic palletizing systems. Leading the full integration of new CapEx equipment has also been part his role.

Josh completed a 3 year Print Technology apprenticeship in Langen (Germany) graduating in 1998. He completed his mandatory Military Service in the German Army (Bundeswehr) in the year 2000. Following the service Josh remained in the German Army reserve and attended the Frankfurt Gutenberg Technical College and graduated as a certified Engineer in the year 2005."
